

## Hong Kong, SAR PR China

The University of Hong Kong

The University of Hong Kong is the island's oldest institute of higher education and formally opened in 1911 with a Faculty of Medicine, although its roots actually go back to 1887 as the Hong Kong College of Medicine for Chinese. The Faculty of Dentistry, based at the Prince Philip Dental Hospital, was established in 1982.

The first postgraduate course dedicated to implant dentistry at the university was launched in 2006 with the introduction of a Master of Science (MSc) in Implant Dentistry program. This part-time two-year program is aimed at practicing dentists in Hong Kong who have already had exposure to patient care for at least two to three years. The program prepares candidates to treat straightforward (S) and, in selected instances, advanced (A) cases.

A second program, the Master of Dental Surgery in Implant Dentistry (MDS Implant Dent) was introduced in fall 2008. This MDS program is devoted to the entire field of implant dentistry including treatment planning, preparatory therapy, implant installation with or without bone augmentation, prosthetic reconstruction and patient maintenance taking biological and technical complications into consideration.

This program prepares candidates to treat straight-forward (S), advanced (A) and complex (C) cases.

### Faculty

The Center is headed up by Professor Niklaus Lang, Professor of Implant Dentistry at the University of Hong Kong and Professor emeritus, University of Bern, Switzerland. Professor Lang's research interests include etiology and patho-genesis of peri-implant infectious disease, risk evaluation, wound healing and oral micro-biology. His multinational faculty includes Dr. Rino Burkhardt, Zurich; Professor Esmonde F. Corbet, Hong Kong; Professor Lisa Heitz-Mayfield, Perth; Professor Li-Jian Jin, Hong Kong; Dr. Martina Lulic, Hong Kong; Professor Bjarni E. Pjetursson, Reykjavik.

### City of Hong Kong

An island with a history and tradition that unite East and West, cosmopolitan Hong Kong exerts an easy fascination over its visitors. Hong Kong has a long relationship to Britain, which was officially severed in 1997 when its sovereignty was transferred to the People's Republic of China. Its tradition, however, remains strongly influenced by its past. Double-decker trams and buses and capitalism combine seamlessly with feng-shui, Chinese culture and dim sum. Food, music, sport and entertainment – all are available in abundance in Hong Kong.

Hong Kong is an exciting place to visit. With very little space between the harbor and the foot of the island's steep hills, the island has grown directly upwards and has well over 7,600 skyscrapers and a good third of the world's tallest building can be found here. The architecture is innovative and the skyline is unique, whether looking out from the Peak towards the sea or from the Star Ferry towards land. On the list of historic sights is the Tsim Sha Tsui Clock Tower, the Central Police Station and the remains of Kowloon Walled City across the harbor.

Hong Kong has an excellent public transportation system with a rapid transit system that serves 3 to 4 million people a day. The international airport is one of the busiest in the world with flights offered by more than 85 airlines.

#### DIFFICULTY LEVEL

Straightforward, Advanced and Complex

#### COURSE DATE

September 11–17, 2011

#### LANGUAGE

English (simultaneous translation into Japanese)

#### COURSE DIRECTORS

##### **Prof. Dr. Niklaus P. Lang**

Director of the Centre for Advanced Dental Care  
Comprehensive Dental Care/Implant Dentistry  
The University of Hong Kong

##### **Prof. Dr. Esmonde F. Corbet**

Director of Graduate Periodontology  
Periodontology/Dental Public Health/  
Dental Hygiene School  
The University of Hong Kong

September 11-17, 2011

## 3<sup>rd</sup> ITI Education Week Hong Kong Contemporary Periodontics and Implant Dentistry

### The ITI University Program

The ITI – International Team for Implantology – is an independent academic organization dedicated to advancing knowledge in the field of implant dentistry and bringing this knowledge to a growing audience. The ITI's educational message and philosophy center on evidence-based treatment approaches that predictably produce successful outcomes.

Introduced in 2009 as a new venture in ITI education, the ITI University Program aims to enhance implant education worldwide by offering coordinated, high quality continuing education courses in implant dentistry around the globe. The premise behind the program is that continuing education in implant dentistry and related fields is best delivered independently of commercial interests for reasons of overall quality and credibility.

To find out more, go to [www.iti.org/educationweek](http://www.iti.org/educationweek).

### University of Hong Kong

The University of Hong Kong is the island's oldest institute of higher education and formally opened in 1911 with a Faculty of Medicine, although its roots actually go back to 1887 and the Hong Kong College of Medicine for Chinese. The Faculty of Dentistry, based at the Prince Philip Dental Hospital, was established in 1982. The first postgraduate course dedicated to implant dentistry at the university was launched in 2006 with the introduction of a Master of Science (MSc) in Implant Dentistry program. A second program, the Master of Dental Surgery in Implant Dentistry (MDS Implant Dent), was introduced in fall 2009.

### Faculty

The Center is headed by Professor Niklaus Lang, Professor of Implant Dentistry at the University of Hong Kong, and Professor emeritus, University of Bern, Switzerland. Professor Lang's research interests include etiology and pathogenesis of peri-implant infectious diseases, risk evaluation, wound healing and oral microbiology. His multinational faculty includes Dr. Rino Burkhardt, Zurich; Professor Esmonde F. Corbet, Hong Kong; Professor Nikolaos Donos, London; Professor Li-Jian Jin, Hong Kong; Dr. Martina Lulic, Hong Kong; Professor Bjarni E. Pjetursson, Reykjavik.

### Course details

This six-day Education Week addresses the general dental practitioner as well as the specialist and postgraduate student in his/her last year of training with an interest in comprehensive dental care. On the basis of daily case presentations and discussions in working groups, comprehensive treatment planning is performed with the aim of implementing new knowledge and biological concepts.

### Topics

- Treatment strategies and treatment planning
- Modern aspects of etiology and pathogenesis of periodontal diseases
- Etiology, pathogenesis, epidemiology diagnosis of peri-implant diseases
- Aggressive periodontitis
- Systemic diseases and periodontal conditions
- Morphogenesis and healing sequences of peri-implant tissues
- Cause-related therapy preparation of patients for implant dentistry
- Periodontal surgery
- Guided tissue regeneration and application of enamel matrix proteins
- Clinical decision making
- Immediate implant installation
- The posterior maxilla and sinus floor elevation
- Implants in the area of esthetic priority
- Modern microsurgical approaches
- Recession coverage at teeth and implants
- Implant-supported reconstructions
- Evidence-based decision making in reconstructive dentistry
- Decision making in the area of esthetic priority
- Maintenance of implant patients, risk evaluation
- Prevention and therapy of peri-implant mucositis and peri-implantitis
- Re-osseointegration
- Five case presentations with treatment planning exercises and case discussions
- Four hands-on exercises in the SIM Lab of the Faculty of Dentistry

#### COURSE FEE

HKD 20,000

(including course materials, coffee breaks,  
three dinner arrangements and visits to Stanley,  
Lamma Island and Victoria Peak)

#### DISCOUNTS

ITI Fellows/Members: 10%

Full-time graduate students: 40%

(written confirmation by program director required)

Current ITI Scholars: on request

OHS Seasonal Ticket holders of  
the Faculty of Dentistry: 10%

#### NO. OF PARTICIPANTS

max. 52

#### CE CREDIT

40 Hours

#### ACCOMMODATION

Hotel information will be provided after registration
