# achieve a higher degree of success

## Your partner in life-long learning

**The Faculty of Dentistry at The University of Hong Kong** has been offering postgraduate and continuing dental education for about three decades. Our distinguished teaching staff, who hail from all corners of the globe, are committed to providing life-long education to local and international professionals alike. Delivered in English and covering all dental disciplines, our up-to-date curricula integrate theory and practice and allow us to nurture future generations of competent and compassionate leaders. I encourage you to take advantage of our programmes to further your career and personal development, so you can achieve **Tomorrow's Dentistry...Today.**

—**Prof Thomas Flemmig**, *HKU Dean of Dentistry*

## Research postgraduate programmes

Our well-established interdisciplinary research postgraduate programmes lead to the degrees of Master of Philosophy (MPhil) and Doctor of Philosophy (PhD), and address a wide range of issues related to oral health.

Our research activities are aligned with HKU's University Strategic Research Themes, and our research groups are organised according to the following three themes: **Biomedical and Tissue Engineering; Infection and Immunity;** and **Public Health and Healthy Ageing.** Applicants may enrol in one of those groups and can contact the relevant group convenor. Alternatively, they may enrol in one of the Faculty's specialty-based research groups listed below and can contact the appropriate advisor:

- Endodontics
- Dental Materials Science
- Dental Public Health
- Implant Dentistry
- Oral and Maxillofacial Surgery
- Oral Biosciences
- Oral Rehabilitation
- Orthodontics and Dentofacial Orthopaedics
- Paediatric Dentistry
- Periodontology

Online details can be found at <http://facdent.hku.hk/index.php/learning/rpg/prospectus/>. University graduates of any discipline can apply, and enrolment is not restricted to dental graduates. A limited number of postgraduate scholarships are available by competition.

## Taught postgraduate programmes

Three levels of taught postgraduate programmes are offered at the HKU Faculty of Dentistry: **Master of Science**, **Master of Dental Surgery**, and **Advanced Diploma**. Nine of our taught postgraduate programmes form part of the training pathways to become a dental specialist in Hong Kong. All our courses continue to generate a high level of interest among dental practitioners both locally and overseas.

Programme	Mode	Director	E-mail
MSc in Community Dentistry*	FT, 1 year PT, 2 years	Prof ECM Lo	hrdplcm@hku.hk

FT=Full-time

PT=Part-time

\* Counts as part of the specialist training pathway of seven relevant dental specialties recognised in Hong Kong

# The MSc in Dental Materials Science is offered to both dentists and non-dentists and does not involve patient contact

Applicants should refer to <http://facdent.hku.hk/index.php/learning/tpg/prospectus> for the online prospectus for the programme syllabuses, entry criteria, and closing dates, and can contact the relevant programme director for any specific queries.

## Continuing dental education & continuing professional development

The HKU Faculty of Dentistry offers regular seminars and courses for continuing dental education and continuing professional development. Such events are usually locally accredited for CME/CPD points, and they are led by Faculty staff, visiting lecturers, and guest speakers who are at the forefront in their disciplines. An emphasis is placed on the critical appraisal and practical application of the latest research evidence and discussion of current policies and best practices.

 Regular continuing dental education series during the academic year include "Advances in Clinical Dentistry and Related Sciences" seminars. Special summer courses are also available in some disciplines. The full schedule for our continuing dental education programme is continually updated and can be found in the Faculty's CDE website (<http://facdent.hku.hk/cde>). Online registration and payment is also conducted through the Faculty's CDE website.
